## OBJECTIVE:

Experienced journeyman electrician seeking a challenging position in wind technology that will utilize my experience and training in wind turbine maintenance and repair.

## EDUCATION:

### **Wind Turbine Technician Academy**

**October 2009 – April 2010**

### **BZEE Certified and Internationally Recognized Wind Turbine Technician Training**

Kalamazoo Valley Community College, Kalamazoo, MI

- Full-time, 26-week, hands-on BZEE certified training in wind turbine maintenance and repair.
- Skills in crane and rig operation, hydraulics, hydraulic torque wrench, generator replacement, laser alignment, torching, welding, motor controls, and blade repair.
- Specialized training in writing service reports, electrical theory, and schematic drawings.

### **National Joint Apprenticeship and Training Committee Program - IBEW Local 117**

NJATC, Elgin, IL

**September 2002-June 2007**

- Completed 10,000 hours of on-the-job and classroom electrical training.
- Implemented the distribution and installation of electrical power for lighting, heat, and motor control.
- Experience with industrial and commercial lighting, transformers, instrumentation, and programmable logic controllers.
- Training and application of electrical theory, blue print reading, and national electrical code.

### **Associates of Arts Degree**

Elgin Community College, Elgin IL

**Graduated 2002**

## PROFESSIONAL EXPERIENCE:

Demonstrated leader with the ability to learn and quickly adapt to different job environments.

- Experience as a Leadman and Foreman managing up to 15 electricians in residential and commercial settings.
- 5 years training and on-the-job experience in commercial, industrial, and residential electrical construction.
- 2+ years of Journeyman Inside-Wireman electrical experience.

### **IBEW 1186, Maui, HI**

**2007-2009**

#### **QN Electric Leadman and Foreman:**

##### *Ritz Carlton Club and Residences at Kapulua Bay*

Experienced Foreman over 15 electricians in main distribution (installation and feeding of all electrical rooms including switch gear, transformers, and distribution panels), underground electrical installation, and distribution of temporary power for commercial job site.

- Communicated daily with crane operators to crane and rig electrical equipment to multi-level buildings.
- Conducted the daily foreman routine as follows: team meetings to review each day's work requirements, review blueprints, provide instruction on the work to be completed, present safety procedures, and recorded the daily log of individual man hours.

### **IBEW 117, Crystal Lake, IL**

**2002-2007**

#### **Nu-line Residential Electrician and Leadman:**

Leadman at various electrical job sites in commercial, residential, and industrial settings. Experienced in site management and supervision of up to 5 electricians.

## SPECIALIZED TRAINING:
